JOURNAL OF THE

Air Pollution Control

ASSOCIATION

ANNUAL INDEX OF AUTHORS AND TITLES

Volume 21 (January-December 1971)

This annual index of authors and titles for Volume 21 of the *Journal of the Air Pollution Control Association* is published as a reader service on the following specially-numbered pages. The author index, appearing on pages ii through iv, lists authors alphabetically and their works chronologically. The title index, appearing on pages v and vi, is subdivided into nine broad classifications with titles listed alphabetically in each category.

AIR POLLUTION CONTROL ASSOCIATION, 4400 Fifth Avenue, Pittsburgh, Pa. 15213

AUTHOR INDEX

Altshuller, A. P. Discussion of National air quality standards for automotive pollutants—A critical review. 21(9) 544–548

Anderson, G. W. A portable, battery-operated, immediate-readout dust-particle analyzer. 21(9) 571–573

Andreatch, A. J. New Jersey REPAIR Project: Tune-up at idle. 21(12) 757–763

Arnold, G. W. United States seen 2.54 centimeter-ing its way to metric system. 21(7) 422–423

Aronowitz, L. Developing a practical dispersion model for an air quality region. 21(9) 549–554

Axelrod, H. D. Note on a further study on prefilter interference for sulfur dioxide measurements. 21(4) 218

Bach, W. F. Variation of solar attenuation with height over an urbanized area. 21(10) 621–628

Bagwell, F. A. Utility boiler operating modes for reduced nitric oxide emissions. 21(11) 702–708

Bagwell, F. A. New developments in dust collecting equipment for electric utilities. TI-5 Public Utilities Committee Survey Report No. 1. 21(12) 781–782

Barth, D. S. Discussion of National air quality standards for automotive pollutants—A critical review. 21(9) 544–548

Blackwell, J. P. Meteorological program for limiting power plant stack emissions. 21(7) 400–405

Bogardus, H. F. The CO_2 pulse technique for determining the condition of adsorbent charcoal beds. 21(11) 709–712

Botkin, D. B. Ozone suppression of white pine net photosynthesis. 21(12) 778–780

Boubel, R. W. A high volume stack sampler. 21(12) 783–787

Bownds, J. M. The formulation of emission control strategies using a cubic polynomial approximation. 21(4) 210–213

Brar, S. S. Areawide trace metal concentrations measured by multielement neutron activation analysis: A one day study in Northwest Indiana. 21(9) 563–570

Breen, B. P. Utility boiler operating modes for reduced nitric oxide emissions. 21(11) 702–708

Brown, R. F. Feasibility demonstration of electrostatic precipitation at 1700°F. 21(10) 617–620

Brown, W. Automated data handling for small authorities. 21(9) 555–558

Calvert, S. Air Pollution research problems. (TR-1 Research Committee Survey Report No. 1.) 21(11) 694–701

Carlson, R. W. Ozone suppression of white pine net photosynthesis. 21(12) 778–780

Carpenter, S. B. Meteorological program for limiting power plant stack emissions. 21(7) 400–405

Carpenter, S. B. Principal plume dispersion models: TVA Power Plants 21(8) 491–495

Cheng, R. T. Aerosol stabilization for laboratory studies of aerosol-gas interactions. 21(3) 138–142

Clink, W. L. Indoor/outdoor air quality relationships. 21(5) 251–259

Colbaugh, W. C. Principal plume dispersion models: TVA Power Plants. 21(8) 491–495

Colpitts, J. W. Operating experience with the Alcoa 398 process for fluoride recovery. 21(8) 479–483

Colucci, J. M. National air quality standards for automotive pollutants—A critical review. 21(9) 535–544

Cook, C. C. Operating experience with the Alcoa 398 process for fluoride recovery. 21(8) 479–483

Corn, M. Aerosol stabilization for laboratory studies of aerosol-gas interactions 21(3) 138–142

Cota, H. M. Air Pollution control training in colleges and universities in the United States. 21(9) 554–562

Cote, W. A. Indoor/outdoor air quality relationships. 21(5) 251–259

Cothern, C. R. Analysis of trace metal particulates in atmospheric samples using x-ray fluorescence. 21(11) 716–719

Cross, F. L., Jr. A training exercise on cost-effectiveness evaluation of air pollution control strategies. 21(2) 66–70

Daily, J. W. Los Angeles gasoline modifications: Its potential as an air pollution control measure. 21(2) 76–80

Dams, R. Areawide trace metal concentrations measured by multielement neutron activation analysis: A one day study in Northwest Indiana. 21(9) 563–570

Danchick, R. Modeling photochemical smog on a computer for decision-making. 21(6) 334–340

de Volo, N. B. Utility boiler operating modes for reduced nitric oxide emissions. 21(11) 702–708

Dittrich, T. R. Analysis of trace metal particulates in atmospheric samples using x-ray fluorescence. 21(11) 716–719

Dittrich, W. Automated data handling for small authorities. 21(9) 555–558

Duckworth, S. A simple technique for measuring mean H_2S concentration. 21(5) 280–283

Elston, J. C. New Jersey REPAIR Project: Tune-up at idle. 21(12) 757–763

Ensor, D. S. Calculation of smoke plume opacity from particulate air pollutant properties. 21(8) 496–501

Falkenberry, H. L. Economic factors in recovery of sulfur dioxide from power plant stack gas. 21(1) 9–15

Feldstein, M. A study of oxidant concentration trends in the San Francisco Bay Area. 21(3) 118–121

Feldstein, M. Microdetermination of fluoride in vegetation by oxygen bomb combustion and fluoride ion electrode analysis. 21(5) 277–279

Feldstein, M. Modifications to an H_2S tape sampler for increasing sensitivity and accuracy in H_2S sampling. 21(10) 636–638

Fensterstock, J. C. Reduction of air pollution potential through environmental planning. 21(7) 395–399

First, M. W. Cleaning of stack gases containing high concentrations of nitrogen oxides. 21(3) 122–127

Fordyce, J. S. Note on a filter holder for high volume sampling of airborne particulates. 21(11) 720

Fraas, F. Note on the removal of sulfur from stack gases by an electrical discharge. 21(3) 143–144

Frohliger, J. O. Aerosol stabilization for laboratory studies of aerosol-gas interactions. 21(3) 138–142

Goldshore, L. P. The state's role in the development of local air pollution control programs. 21(3) 115–117

Gorman, P. G. Particulate air pollution in the United States. 21(6) 321–328

Graff, R. A. Panel bed filters for simultaneous removal of fly ash and sulfur dioxide. III. Reaction of sulfur dioxide with half-calcined dolomite. 21(5) 272–276

Gruber, C. W. Soiling potential—A promising technique for evaluating plumes from fossil fuel combustion. 21(4) 214–217

Hallman, G. Automated data handling for small authorities. 21(9) 555–558

Hamburg, F. C. A training exercise on cost-effectiveness evaluation of air pollution control strategies. 21(2) 66–70

Hamburg, F. C. Some basic considerations on the design of an air pollution monitoring system. 21(10) 609–613

Hanna, S. R. A simple method of calculating dispersion from urban area sources. 21(12) 774–777

Hanst, P. L. Mechanism of peroxyacetyl nitrate formation. 21(5) 269–271

Harrison, P. R. Areawide trace metal concentrations measured by multielement neutron activation analysis: A one day study in Northwest Indiana. 21(9) 563–570

Hemeon, W. C. L. Malodors—A basis for regulations. 21(12) 770–773

Heuss, J. M. National air quality standards for automotive pollutants—A critical review. 21(9) 535–544

Hiatt, V. E. The survival of airborne *serratia marcescens* in urban concentrations of sulfur dioxide. 21(10) 639–645

Hickey, H. R. A cost model for air quality monitoring systems. 21(11) 689–693

Hill, A. C. Vegetation: A sink for atmospheric pollutants. 21(6) 341–346

Horton, R. J. M. Discussion of National air quality standards for automotive pollutants—A critical review. 21(9) 544–548

Ingersoll, R. B. Note on the soil as a natural sink for carbon monoxide. 21(10) 646

Ingraham, T. R. Note on the mechanism of the absorption of SO_2 by limestone. 21(6) 347

Inman, R. E. Note on the soil as a natural sink for carbon monoxide. 21(10) 646

Jamieson, J. K. The role of industry—Air quality. 21(2) 62–64

John, W. Diurnal variation of aerosol trace element concentrations in Livermore, California. 21(7) 407–409

Kerho, S. Utility boiler operating modes for reduced nitric oxide emissions. 21(11) 702–708
King, R. B. Note on a filter holder for high volume sampling of airborne particulates. 21(11) 720
Kittredge, G. D. Review of federally sponsored research on diesel exhaust odors. 21(12) 764–769
Kleinman, F. F. The regional approach to air pollution control. 21(2) 71–75
Kling, R. G. A versatile electrochemical monitor for air-quality measurements. 21(7) 414–417
Knelson, J. H. Discussion of National air quality standards for automotive pollutants—A critical review. 21(9) 544–548
Kokin, A. Modeling photochemical smog on a computer for decision-making. 21(6) 334–340

APCA COMMITTEES

S-11 Education and Training Committee. Air Pollution control training in colleges and universities in the United States. (Survey Report No. 2). Principal Author: H. M. Cota. 21(9) 559–562
TA-10 Vehicular Exhaust Committee. Principal Author: John N. Pattison.
New federal driving cycle for emission tests. 21(2) 88–89
Pros and cons for lead in gasoline. 21(6) 354–355
Control of used cars by inspection and maintenance. 21(9) 574–575
Inspection procedures available for control of emissions from used cars. 21(10) 656–658
TI-3 Petroleum Committee. Control of Atmospheric Emissions from petroleum storage tanks. (Informative Report No. 2). 21(5) 260–268
TI-5 Public Utilities Committee. New developments in dust collecting equipment for electric utilities. (Survey Report No. 1). Principal Authors: F. A. Bagwell and R. G. Velte. 21(12) 781–782
TR-1 Research Committee. Air Pollution Research Problems. (Survey Report No. 1). Principal Author: S. Calvert. 21(11) 694–701
TR-2 Air Pollution Measurements Committee. Air Pollution Measurements Committee looks at EPA's proposed test methods. Principal Author: R. A. Herrick. 21(10) 652

TITLE INDEX

For the convenience of the reader, the Title Index on the following pages has been subdivided into nine broad classifications, with titles listed alphabetically within each category. The classifications are as follows:

I. Sources
  1. Mobile Combustion
  2. Stationary Combustion
  3. Process Industries
  4. Metallurgical Industries

II. Effects
  1. Agricultural

III. Control Technology
  1. Gases and Odors
  2. Particulate

IV. Meteorological Aspects

V. Air Pollution Measurements
  1. Measurement Techniques
  2. Data Interpretation

VI. Control Program Administration
  1. Regulations and Standards
  2. Programs and Techniques

VII. Education and Training

VIII. Basic Science and Technology

IX. Special Reports

SOURCES

Mobile Combustion

Control of used cars by inspection and maintenance. J. N. Pattison. TA-10 Vehicular Exhaust Committee. 21(9) 574–575

Inspection procedures available for control of emissions from used cars. J. N. Pattison. TA-10 Vehicular Exhaust Committee. 21(10) 656–658

Los Angeles gasoline modification: Its potential as an air pollution control measure. J. W. Daily. 21(2) 76–80

New federal driving cycle for emission tests. J. N. Pattison. TA-10 Vehicular Exhaust Committee. 21(2) 88–89

New Jersey REPAIR Project: Tune-up at idle. A. J. Andreatch, J. C. Elston, and R. W. Lahey. 21(12) 757–763

Pros and cons for lead in gasoline. J. N. Pattison. TA-10 Vehicular Exhaust Committee. 21(6) 354–355

Review of Federally sponsored research on diesel exhaust odors. J. H. Somers and G. D. Kittredge. 21(12) 764–769

Stationary Combustion

Cooling tower fog: Control and abatement. H. Veldhuizen and J. Ledbetter. 21(1) 21–24

Economic factors in recovery of sulfur dioxide from power plant stack gas. A. V. Slack, G. G. McGlamery, and H. L. Falkenberry. 21(1) 9–15

Meteorological program for limiting power plant stack emissions. J. M. Leavitt, S. B. Carpenter, J. P. Blackwell and T. L. Montgomery. 21(7) 400–405

New developments in dust collecting equipment for electric utilities. TI-5 Public Utilities Committee (Survey Report No. 1). F. A. Bagwell and R. G. Velte. 21(12) 781–782

Utility boiler operating modes for reduced nitric oxide emissions. F. A. Bagwell, K. E. Rosenthal, D. P. Teixeira, B. P. Breen, N. B. de Volo and S. Kerho. 21(11) 702–708

Process Industries

The composition of glass furnace emissions. J. D. Stockham. 21(11) 713–715

Control of atmospheric emissions from petroleum storage tanks. Informative Report No. 2 TI-3 Petroleum Committee Air Pollution Control Association. 21(5) 260–268

Control of particulate emissions from lime plants. L. J. Minnick. 21(4) 195–200

Metallurgical Industries

Control of sulfur oxide emissions from primary copper, lead, and zinc smelters—A critical review. K. T. Semrau. 21(4) 185–194

Operating experience with the Alcoa 398 process or fluoride recovery. C. C. Cook, G. R. Swany and J. W. Colpitts. 21(8) 479–483

EFFECTS

Agricultural

Economic effects of sulfur dioxide on forest growth. S. N. Linzon. 21(2) 81–86

Effects of fluoride on agriculture. L. H. Weinstein and D. C. McCune. 21(7) 410–413

Effects of hydrogen fluoride on bean reproduction. M. R. Pack. 21(3) 133–137

Vegetation: A sink for atmospheric pollutants. A. C. Hill. 21(6) 341–346

CONTROL TECHNOLOGY

Gases and Odors

Cleaning of stack gases containing high concentrations of nitrogen oxides. M. W. First and F. J. Viles, Jr. 21(3) 122–127

The CO_2 pulse technique for determining the condition of adsorbent charcoal beds. A. Stamulis, J. K. Thompson and H. F. Bogardus. 21(11) 709–712

Control of atmospheric emissions from petroleum storage tanks. Informative Report No. 2 TI-3 Petroleum Committee Air Pollution Control Association. 21(5) 260–268

Control of sulfur oxide emissions from primary copper, lead, and zinc smelters—A critical review. K. T. Semrau. 21(4) 185–194

Cooling tower fog: Control and abatement. H. Veldhuizen and J. Ledbetter. 21(1) 21–24

Economic factors in recovery of sulfur dioxide from power plant stack gas. A. V. Slack, G. G. McGlamery, and H. L. Falkenberry. 21(1) 9–15

Los Angeles gasoline modification: Its potential as an air pollution control measure. J. W. Daily. 21(2) 76–80

Note on the mechanism of the absorption of SO_2 by limestone. T. R. Ingraham and P. Marier. 31(6) 347

Note on a new process for SO_2 absorption and recovery. W. E. Winsche, E. Wirsing, Jr., and R. H. Wiswall, Jr. 21(1) 20

Note on the removal of sulfur from stack gases by an electrical discharge. F. J. Palumbo and F. Fraas. 21(3) 143–144

Utility boiler operating modes for reduced nitric oxide emissions. F. A. Bagwell, K. E. Rosenthal, D. P. Teixeira, B. P. Breen, N. B. de Volo and S. Kerho. 21(11) 702–708

Particulate

Control of particulate emissions from lime plants. L. J. Minnick. 21(4) 195–200

Feasibility demonstration of electrostatic precipitation at 1700°F. R. F. Brown and A. B. Walker. 21(10) 617–620

New developments in dust collecting equipment for electric utilities. TI-5 Public Utilities Committee (Survey Report No. 1). F. A. Bagwell and R. G. Velte. 21(12) 781–782

Operating experience with the Alcoa 398 process for fluoride recovery. C. C. Cook, G. R. Swany and J. W. Colpitts. 21(8) 479–483

Panel bed filters for simultaneous removal of fly ash and sulfur dioxide: II. Filtration of dilute aerosols by sand beds. L. Paretsky, L. Theodore, R. Pfeffer, and A. M. Squires. 21(4) 204–209

Panel bed filters for simultaneous removal of fly ash and sulfur dioxide. III. Reaction of sulfur dioxide with half-calcined dolomite. A. M. Squires and R. A. Graff. 21(5) 272–276

METEOROLOGICAL ASPECTS

Developing a practical dispersion model for an air quality region. S. N. Milford, G. C. McCoyd, L. Aronowitz, J. H. Scanlon and C. Simon. 21(9) 549–554

Diurnal variation of aerosol trace element concentrations in Livermore, California. K. Rahn, J. J. Wesolowski, W. John, and H. R. Ralston. 21(7) 407–409

Meteorological program for limiting power plant stack emissions. J. M. Leavitt, S. B. Carpenter, J. P. Blackwell and T. L. Montgomery. 21(7) 400–405

Principal plume dispersion models: TVA Power Plants. S. B. Carpenter, T. L. Montgomery, J. M. Leavitt, W. C. Colbaugh and F. W. Thomas. 21(8) 491–495

A simple method of calculating dispersion from urban area sources. S. R. Hanna. 21(12) 774–777

An urban diffusion model for estimating long term average values of air quality. D. O. Martin. 21(1) 16–19

Variation of solar attenuation with height over an urbanized area. W. F. Bach. 21(10) 621–628

AIR POLLUTION MEASUREMENTS

Measurement Techniques

Calculation of smoke plume opacity from particulate air pollutant properties. D. S. Ensor and M. J. Pilat. 21(8) 496–501

Note on the construction of an hydrocarbon inducer. R. B. McCann. 21(8) 502

Note on a filter holder for high volume sampling of airborne particulates. R. B. King and J. S. Fordyce. 21(11) 720

Note on a further study on prefilter interference for sulfur dioxide measurements. H. D. Axelrod, R. J. Teck, and J. P. Lodge, Jr. 21(4) 218

A high volume stack sampler. R. W. Boubel. 21(12) 783–787

Instrumental method substitutes for visual estimation of equivalent opacity. H. C. McKee. 21(8) 488–490

Modifications to an H_2S tape sampler for increasing sensitivity and accuracy in H_2S sampling. W. Siu, D. A. Levaggi, L. Potter, R. Martin and M. Feldstein. 21(10) 636–638

A portable, battery-operated, immediate-readout dust-particle analyzer. V. Withstandley, W. J. Moroz, and G. W. Anderson. 21(9) 571–573

A simple technique for measuring mean H_2S concentration. S. Duckworth. 21(5) 280–283

Soiling potential—A promixing technique for evaluating plumes from fossil fuel combustion. S. A. Reigel and C. W. Gruber. 21(4) 214–217

TR-2 Air Pollution Measurements Committee looks at EPA's proposed test methods. Principal author: R. A. Herrick. 21(10) 652–653

A versatile electrochemical monitor for air-quality measurements. D. F. Miller, W. E. Wilson, Jr., and R. G. Kling. 21(7) 414–417

Data Interpretation

Areawide trace metal concentrations measured by multielement neutron activation analysis: A One Day study in Northwest Indiana. P. R. Harrison, K. A. Rahn, R. Dams, J. A. Robbins, J. W. Winchester, S. S. Brar and D. M. Nelson. 21(9) 563–570

Fluoride concentrations in the ambient air. R. J. Thompson, T. B. McMullen and G. B. Morgan. 21(8) 484–487

Indoor/outdoor air quality relationships. J. E. Yocom, W. L. Clink, and W. A. Cote. 21(5) 251–259

Particulate air pollution in the United States. A. E. Vandergrift, L. J. Shannon, E. E. Sallee, P. G. Gorman and W. R. Park. 21(6) 321–328

Patterns and trends in levels of suspended particulate matter. R. Spirtas and H. J. Levin. 21(6) 329–333
A study of the oxidant concentration trends in the San Francisco Bay Area. J. S. Sandberg, R. Thuillier, and M. Feldstein. 21(3) 118–121

CONTROL PROGRAM ADMINISTRATION

Regulations and Standards

Discussion of National air quality standards for automotive pollutants—A critical review. D. S. Barth, J. C. Romanovsky, J. H. Knelson, A. P. Altshuller, and R. J. M. Horton. 21(9) 544–548
Environmental Protection Agency sets National Air Quality Standards for sulfur oxides, particulate matter, carbon monoxide, photochemical oxidants, nitrogen oxides, and hydrocarbons. 21(6) 352–353
Malodors—A basis for regulations. W. C. L. Hemeon. 21(12) 770–773
National air quality standards for automotive pollutants—A critical review. J. M. Heuss, G. J. Nebel and J. M. Colucci. 21(9) 535–544
New priorities in air pollution control. V. H. Sussman. 21(4) 201–203

Programs and Techniques

APEX—A training exercise for air pollution control officers. 21(3) 146–148
Automated data handling for small authorities. W. Dittrich, W. Brown, G. Hallman and E. Nelson. 21(9) 555–558
A cost model for air quality monitoring systems. H. R. Hickey, W. D. Rowe and F. Skinner. 21(11) 689–693
The formulation of emission control strategies using a cubic polynomial approximation. J. M. Bownds. 21(4) 210–213
Modeling photochemical smog on a computer for decision-making. L. Wayne, R. Danchick, M. Weisburd, A. Kokin and A. Stein. 21(6) 334–340
New Jersey REPAIR Project: Tune-up at idle. A. J. Andreatch, J. C. Elston, and R. W. Lahey. 21(12) 757–763
Reduction of air pollution potential through environmental planning. J. C. Fensterstock, J. A. Kurtzweg and G. Ozolins. 21(7) 395–399
The regional approach to air pollution control. F. F. Kleinman. 21(2) 71–75
Some basic considerations in the design of an air pollution monitoring system. F. C. Hamburg. 21(10) 609–613
The state's role in the development of local air pollution control programs. L. P. Goldshore and J. J. Tozzi. 21(3) 115–117
A training exercise on cost-effectiveness evaluation of air pollution control strategies. F. C. Hamburg and F. L. Cross, Jr. 21(2) 66–70

EDUCATION AND TRAINING

Air pollution control training in colleges and universities in the United States. H. M. Cota. S-11 Education and Training Committee Survey Report No. 2. 21(9) 554–562
APCA announces blue ribbon winners for 1970 Cleaner Air Week activities. 21(6) 358
Environmental Protection Agency lists schedule of air pollution training courses. 21(8) 504–505

BASIC SCIENCE AND TECHNOLOGY

Aerosol formation in photochemical smog: I. Effect of stirring. W. E. Wilson, Jr., E. L. Merryman, A. Levy, and H. R. Taliaferro. 21(3) 128–132
Aerosol stabilization for laboratory studies of aerosol-gas interactions. R. T. Cheng, J. O. Frohliger, and M. Corn. 21(3) 138–142
Air pollution research problems. (TR-1 Research Committee Survey Report No. 1.) S. Calvert. 21(11) 694–701
Analysis of trace metal particulates in atmospheric samples using x-ray fluorescence. T. R. Dittrich and C. R. Cothern. 21(11) 716–719
The composition of glass furnace emissions. J. D. Stockham. 21(11) 713–715
The effect of water vapor on ozone synthesis in the photo-oxidation of Alpha-Pinene. L. A. Ripperton and D. Lillian. 21(10) 629–635
Malodors—A basis for regulations. W. C. L. Hemeon. 21(12) 770–773
Mechanism of peroxyacetyl nitrate formation. P. L. Hanst. 21(5) 269–271
Microdetermination of fluoride in vegetation by oxygen bomb combustion and fluoride ion electrode analysis. D. A. Levaggi, W. Oyung, and M. Feldstein. 21(5) 277–279
Note on the soil as a natural sink for carbon monoxide. R. E. Inman and R. B. Ingersoll. 21(10) 646
Ozone suppression of white pine net photosynthesis. D. B. Botkin, W. H. Smith, and R. W. Carlson. 21(12) 778–780
Photo-oxidation of sulfur dioxide. D. S. Sethi. 21(7) 418–420
Review of Federally sponsored research on diesel exhaust odors. J. H. Somers and G. D. Kittredge. 21(12) 764–769
The survival of airborne *serratia marcescens* in urban concentrations of sulfur dioxide. B. Lighthart, V. E. Hiatt, and A. T. Rossano, Jr. 21(10) 639–645
Use of 1970 census of population data for air pollution research. E. Landau. 21(10) 614–616

SPECIAL REPORTS

Annual index of authors and titles for volume 20 of the Journal of the Air Pollution Control Association. 21(1) i–vi
APCA to sponsor tour of European air pollution operations. 21(10) 662
Consultant Guide/1971. A listing under five broad geographical regions of consultants and consulting firms practicing in the field of air pollution control. 21(7) 445–452
Graphic Arts Technical Foundation holds first air quality conference. 21(3) 150
Product Guide/1972. Directory lists manufacturers of emission control equipment and air pollution instrumentation. 21(12) 809–822
Program for 64th annual meeting of the Air Pollution Control Association held June 27–July 1, 1970 in Atlantic City, New Jersey. 21(6) 371–383
Summary of the Second International Clean Air Congress activities held December 6–11, 1970 in Washington, D. C. 21(2) 51–65
Summary of the 64th annual meeting of the Air Pollution Control Association activities held June 27–July 1, 1971 in Atlantic City, New Jersey. 21(8) 468–477
United States seen 2.54 centimetering its way to metric system. G. W. Arnold. 21(7) 422–423

OTHER INDEXES

Author and title indexes for previous volumes of the Journal of the Air Pollution Control Association include:

Volumes 1 through 4, which were published in Volume 1 Number 1 of the APCA Abstracts, June 1955.

Volumes 5 through 15, which were published in Part II of the APCA Journal, May 1966.

Volume 16, which was published in the APCA Journal, January 1967.

Volume 17, which was published in the APCA Journal, January 1968.

Volume 18, which was published in the APCA Journal, January 1969.

Volume 19, which was published in the APCA Journal, January 1970.

Volume 20, which was published in the APCA Journal, January 1971.
